

# WALD, SOFA by ACHT Lana Christoph

A small instruction in pictures to build a Waldsofa!

determine the size

- take as many people as you need in the circle of Waldsofa, plus 2 (for the entrance)
- make a circle with the people
- run in a circle and shuffle your feet to mark the area for the seats
- each person has three sticks with them
- all squat down and put a stick behind them and one in front of them in the ground
- with this the seat of the Waldsofa is marked
- take the firer stick and mark the backrest approx. 30 cm outside

a song for the circle:

The river is flowing  
flowing and growing  
The river is flowing  
back to the sea.  
Mother earth carries me  
your child I will always be  
Mother earth carries me  
back to the sea.

- Backrest posts: ~ 1,8 m long  
distance to each other:  
~ 0,6 m
- Attention: long posts in  
two rows!
- posts for seats approx  
0,6 m long

Material, what does it need?

- tools:
  - hole punch: 2x
  - hand saws: 5-7x
  - big hammers: 2x
  - branch shears: many, large and small
- wood material:
  - a lot of fine branches for the seat  
(ask the forester if he can contribute something)
  - flicker branches for the backrest
  - string to tie
  - wire for binding
